

# Enes Tekin

## Frontend Developer

### PROFESSIONAL EXPERIENCE

#### Akinon

Front End Developer | September, 2024 - December, 2024

- Designed and implemented scalable e-commerce websites for various industries using the Omnitron Headless CMS platform.
- Developed user-friendly interfaces with a focus on performance and responsiveness, achieving a 12% improvement in customer interaction metrics.
- Delivered complete solutions from design to deployment, aligning with customer requirements.
- Played a key role in creating landing pages, category listing pages, product detail pages, and checkout processes.
- Stack: React.js, Next.js, Redux, TypeScript, TailwindCSS

#### Trive

Front End Developer | November, 2023 - January, 2024

- Identified and resolved application issues using VSCode's debugger and browser developer tools, ensuring optimal functionality.
- Improved app performance by refactoring legacy class components, reducing unnecessary renders and network requests, resulting in a 15% reduction in page load time.
- Collaborated with analysts and backend developers to deliver new features for client-facing and back-office applications.
- Stack: React.js, Styled Components, Redux-Saga, TypeScript, Semantic UI React

#### Denebunu

Front End Developer | December, 2022 - November, 2023

- Led the development of "Sorbunu," a research platform with an admin dashboard, enabling users to define research questions for target audiences.
- Delivered a highly responsive and intuitive user interface by leveraging advanced React concepts.
- Added functionality to visualize survey results using interactive chart components, allowing for comparisons and detailed insights.
- Integrated iyzico payment methods to facilitate secure transactions within the platform.
- Migrated the codebase from Redux-Thunk to Redux-Saga using Redux Toolkit, improving application maintainability and reducing code complexity by 20%.
- Enabled exporting survey results in formats like CSV and Excel, enhancing data accessibility and analysis.
- Integrated Sentry for real-time performance monitoring and error tracking, reducing error response time by 30%.
- Developed a highly responsive and intuitive user interface by leveraging advanced React concepts, designing reusable UI components, and architecting a scalable application structure.
- Built secure authentication flows with Axios interceptors and enhanced API interaction efficiency with RESTful services.
- Stack: React.js, Axios, Formik, HeadlessUI, Redux-Saga, Next.js, TailwindCSS, i18n

#### Akinon

Front End Developer | October, 2021- December, 2022

- Built and maintained e-commerce websites compatible with the Omnitron CMS platform, streamlining content updates.
- Collaborated with brands to design and develop engaging landing pages, driving user engagement and increasing conversion rates by 10%.
- Enhanced website performance by optimizing Cumulative Layout Shift (CLS) and implementing SEO best practices, resulting in a 20% improvement in Google Lighthouse scores.
- Implemented secure payment methods like Masterpass, G-pay to facilitate smooth customer transactions.
- Stack: React.js, REST APIs, Webpack, SCSS, LESS, TailwindCSS, Jinja, jQuery, Bootstrap

#### Enoca

Junior Front End Developer | May, 2021 - November, 2021

- Translated responsive UI/UX mockups into production-ready, cross-device compatible code.
- Ensured optimal user experience through ongoing maintenance, proactive bug fixes, and code optimization.
- Stack: JavaScript, jQuery, SCSS, LESS, Git, Jinja, Bootstrap
